Roll no - 1121090

I S S C L

Q-1(a) The Three security aspects of google accounts are -

1- Prevent unauthorized access to your account ->

advance protection requires security keys for sign to help protect your google data like emails, documents, contacts or other personal google data. Even if a hacker has your username & password they can't sign in without your security key.

2- Provides extra protection from harmful downloads.

Advanced protection performs extra checks on the download when downloading a file that may be harmful, it notifies you or blocks the download on your Android phone, only apps from verified stores are allowed.
